

Lesson Plan

Name of Faculty : Ms. Sonam, Assistant Professor of CSE
Discipline : Computer Science and Engineering
Semester : VIIIth (Even)
Subject : Software Testing and Quality Assurance- PEC-CSE412-T
Lesson Plan Duration : 15 weeks (from January/ February-2023 to June/July-2023)
Work Load (Lecture/Practical) per week (in hours): (3-L) hours

Week	Theory		Topic Covered Date and Remarks		
	Lecture- Day	Topic (Including Assignment/Test)	Date	HOD	Director- Principal
1 st	1	Introduction to Basic of Software Testing & Terminology			
	2	Software Development & Software Testing Life Cycle- Role and Activities			
	3	Necessity and Objectives of testing, Quality Concepts			
2 nd	4	Quality Control			
	5	McCall's factor model			
	6	Different Software Development Model, Object- oriented testing			
3 rd	7	Web testing			
	8	GUI testing			
	9	Elements of Software quality assurance, Quality Assurance Activities			
4 th	10	Statistical Quality Assurance; Software Reliability			
	11	SQA Plan, Quality Standards: -IEEE, CMM, ANSI			
	12	Testing Concepts, Issues and Techniques, Levels of Testing			
5 th	13	Verification and Validation Model , System testing, Installation Testing,			
	14	Techniques of Verification: -Peer Review, Walkthrough, Inspection, FTR, Usability Testing			
	15	Unit testing, Integration testing, Function Testing			
6 th	16	Regression testing			
	17	Performance testing: -Load Testing, Stress Testing			
	18	Security testing, Volume testing; Acceptance testing: -Alpha testing, Beta testing, Gamma testing.			
7 th		1st Minor Test			
8 th	19	Black Box Testing Methods: Equivalence partitioning, Boundary-value analysis			
	20	Error guessing, graph- based testing methods, Decision Table Testing			
	21	White Box Testing Methods: Statement coverage,			
9 th	22	Decision coverage			
	23	Condition coverage, Path testing, Data flow testing			
	24	Test Planning & Documentation: Development plan and quality plan objectives			
10 th	25	Testing Strategy, Test Management			
	26	Testing Strategy, Test Management			
	27	Strategic Management			
11 th	28	Operational Test Management, Managing the Test Team			
	29	Testing Tools, Features of test tool			
	30	Test Plans, Test Cases, Test Data, Risk Analysis.			
12 th	31	Guidelines for selecting a tool			
	32	Tools and skills of tester			
	33	Static testing tools, Dynamic testing tools			
13 th	34	Advantages and disadvantages of using tools			
	35	Revision and Problem Solving			
	36	Introduction to open-source testing tool			
14 th		2nd Minor Test			
15 th	37	Revision and Problem Solving			
	38	Revision and Quiz			
	39	Revision and Problem Solving			

Software Testing and Quality Assurance- PEC-CSE412-T

General Course Information

Course Code: PEC-CSE412-T/ PEC-IT412-T Course Credits: 3 Type: Professional Elective Contact Hours: 3 hours/week Mode: Lectures (L) Examination Duration: 3 hours	Course Assessment Methods (internal: 30; external: 70) Two minor examinations (20 marks), Class Performance measured through percentage of lectures attended (4 marks), assignments (6 marks), and the end- semester examination (70 marks). For the end semester examination, nine questions are to be set by the examiner. A candidate is required to attempt 5 questions in all. All questions carry equal marks. Question number 1 will be compulsory and based on the entire syllabus. It will contain seven parts of 2 marks each. Question numbers 2 to 9 will be given by setting two questions from each of the four units of the syllabus. A candidate is required to attempt the remaining four questions by selecting one question from each of the four units.
---	---

Pre-requisites: Software Engineering.

About the Course:

This course introduces students to software testing process and describes the quality assurance process and its role in software development. During the course students learn about the testing methods and tools, creating good test cases to improve the quality of software.

Course Outcomes: By the end of the course students will be able to:

- CO1. **Recall** the process of software testing life cycle and quality assurance. (LOTS: Level 1: Remember)
- CO2. **Demonstrate** reusability testing on software applications. (LOTS: Level 2: Understand)
- CO3. **Apply** software testing tools for predicting the behavior of software applications. (LOTS: Level 3: Apply)
- CO4. **Identify** the test cases for software applications. (HOTS: Level 4: Analyse)
- CO5. **Plan** test cases and quality management activities. (HOTS: Level 6: Create)
- CO6. **Predict** software quality based on quality parameters and quality models. (HOTS: Level 6: Create)

Course Content

Unit I

Introduction to Basic of software testing & Terminology, Software Development & Software Testing Life Cycle- role and activities, Necessity and Objectives of testing; Quality Concepts, Quality Control, McCall's factor model; Different Software Development Model; Object-oriented testing, Web testing, GUI testing; Elements of Software quality assurance; Quality Assurance Activities, Statistical Quality Assurance; Software Reliability, SQA plan, Quality Standards: -IEEE, CMM, ANSI.

Unit II

Testing Concepts, Issues and Techniques, Levels of Testing, Verification and Validation Model; Techniques of Verification: -Peer Review, Walkthrough, Inspection, FTR; Unit testing, Integration testing, Function Testing; System testing, Installation Testing, Usability Testing, Regression testing; Performance testing: -Load Testing, Stress Testing, Security testing, Volume testing; Acceptance testing: -Alpha testing, Beta testing, Gamma testing.

Unit III

Black Box Testing Methods: Equivalence partitioning, Boundary-value analysis, Error guessing, graph-based testing methods, Decision Table Testing; White Box Testing Methods: Statement coverage, Decision coverage, Condition coverage, Path testing, Data flow testing.

Test Planning & Documentation: Development plan and quality plan objectives; Testing Strategy, Test Management, Strategic Management, Operational Test Management, Managing the Test Team, Test Plans, Test Cases, Test Data, Risk Analysis.

Unit IV

Testing Tools, Features of test tool; Guidelines for selecting a tool; Tools and skills of tester; Static testing tools, Dynamic testing tools, Advantages and disadvantages of using tools, Introduction to open-source testing tool.
